Product Description

Product Description:

Our Stainless Steel Antibacterial product boasts a Full Hard hardness, ensuring its durability and longevity. It is also extremely easy to clean, thanks to its Hygiene feature. This makes it a great choice for applications where cleanliness and sanitation are of utmost importance.

In addition to its superior strength and hygiene features, our Stainless Steel Antibacterial product also has an impressive surface finish. It is available in a variety of surface finishes, including 2B, HL, and 8K, among others. This makes it easy to find the perfect finish for your specific application.

Our Stainless Steel Antibacterial product is also coated with a special Antibacterial Powder Coating. This coating helps to inhibit the growth and spread of harmful bacteria, making it an excellent choice for use in medical facilities, laboratories, and other environments where sanitation is a top priority. Additionally, our product is compatible with a wide range of Disinfectant Sanitizers, ensuring that it can be easily and effectively cleaned.

Finally, our Stainless Steel Antibacterial product is coated with a Z30-Z40 coating, which provides an additional layer of protection against corrosion and wear. This coating helps to extend the lifespan of our product, making it an excellent investment for any industrial application.

Overall, our Stainless Steel Antibacterial product is an excellent choice for any application where strength, hygiene, and corrosion resistance are important. With its impressive features and high-quality manufacturing standards, it is sure to exceed your expectations and provide long-lasting performance.
